Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The amendment filed 11/13/07 has been entered. Claims 5-6, 13, 21, and 26 have been canceled. New claims 54-58 have been added. Claims 1-4, 7-12, 14-20, 22-25, and 27-58 are pending in the application. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 19 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 19 has been amended to recite that the barrier layer thickness is from “about 0.1 microns to about 10.0 microns” however the incorporation of the term “about” extends the range beyond the values originally disclosed and supported by the specification at the time of filing.

4. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 4 recites the limitation "on the support layer" in lines 2-3. There is insufficient antecedent basis for this limitation in the claim.

Terminal Disclaimer

5. The terminal disclaimers filed on 11/13/07 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of the cited co-pending applications are currently been reviewed.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 31-36, 45, 46, and 48 are rejected under 35 U.S.C. 102(a) or (e) as being anticipated by Smith et al (US 2003/0108499 A1). Smith et al teach a deodorant composition that may be applied to a garment worn next to the skin, wherein the deodorant composition comprises a suspension of particulate transition metal chelators that inhibit the growth of microbes wherein the metal chelators have affinity for iron (III) with a binding constant of greater than 10^{10} , preferably greater than 10^{26} , wherein Smith et al list preferred chelators that would inherently meet the claimed limitations (Abstract; Paragraphs 0011-0026.) With respect to Claims 46 and 48, the Examiner notes that the terms “a bandage” and “a diaper” provide no additional structural or material limitations to the claims to differentiate the article from the teachings of Smith et al.

Double Patenting

8. Claims 1-4, 7-12, 14-20, 22-25, and 27-58 remain provisionally rejected on the ground of nonstatutory obviousness-type double patenting for the reasons recited in the prior office action pending the review and approval of the terminal disclaimers filed 11/13/07.

Response to Arguments

9. Applicant's arguments filed 11/13/07 have been considered but are moot in view of the new ground(s) of rejection. The double patenting rejections are pending the review of the terminal disclaimers filed 11/13/07 but will be withdrawn once the terminal disclaimers are approved.
